

🥁 DRUMS	
OSC 22	Synth Kick <i>Macrosynth KICK; 23 is cymbal, 24 is snare</i>
DRUM ENV	Punchy Transient <i>Drum envelope on pitch: high peak, fast drop, short body</i>
KIL 02	Tight Hats <i>Hard-cut closed hats after 2 ticks for a crisp tick</i>
RET 03	Hat & Snare Rolls <i>Retrig every 3 ticks; first digit 1–7 fades, 9–F swells</i>
NXT	Layered Hits <i>Fire a second instrument on the next track (clap on snare)</i>
OSC 21	Metal Percussion <i>STRUCK DRUM / BELL, or PLUCKED on very low notes</i>
ERR	Lo-Fi Drift <i>A little ERR jitters pitch and params on each hit</i>
VEL	Accents <i>Vary hat velocity so a straight grid stops sounding robotic</i>
CUT	Opening Hats <i>Ramp cutoff across a bar so hats brighten into the drop</i>
PAN	Wide Percussion <i>Alternate PAN on shakers; keep kick and snare centered</i>
PIT	Tuned Drums <i>Tune the kick and toms to the song's key</i>

🕒 RHYTHM & GROOVE	
GRV	Swing <i>Groove 07 05 or 08 04 swings 16ths (06 06 is straight)</i>
CHA 8F	Ghost Notes <i>Note plays about half the time; right-side FX always run</i>
DEL 03	Late Hit <i>Push one hit half a step (6 ticks = 1 step)</i>
MTT	Humanize <i>Sub-tick nudge in 1/8 ticks; 80–FF pulls early</i>
00	Odd Meters <i>A 00 value in a groove skips that step entirely</i>
GRV	Polyrhythm <i>Give tracks grooves of different lengths to drift in phase</i>
NTH	Fills <i>Play a hit only on certain loops; see on-screen help</i>
RND	Per-Hit Variation <i>Randomize the previous FX within a digit range</i>
SED	Repeatable Random <i>Set a seed at a section start so CHA and RND repeat</i>
GRV	Triplets <i>A groove of 04 makes that track's steps 16th-note triplets</i>
GRV	Half-Time <i>A groove of 0C doubles each step's length</i>
RMX	Cut-Up Jumps <i>Moves the playhead on all tracks to the left</i>

🎧 BASS & LEADS	
PSL	Acid Slides <i>Slide into notes; pair with a resonant filter and short decay</i>
SUB	Instant Low End <i>Hypersynth sub oscillator under chords or a mono line</i>
LIM	Grit <i>SIN or FOLD limiter types add harmonics to a dull bass</i>
AMP	Drive <i>Push AMP into the limiter for saturation</i>
PVB	Lead Vibrato <i>Add after the attack for expressive leads; PVX for extreme</i>
PBN	Dive Bomb <i>Continuous bend; 80–FF bends down, pair with a VOL fade</i>
OFF	Natural Release <i>OFF lets an ADSR note release; KIL cuts it dead</i>
CUT	Pluck <i>Short AHD on cutoff turns a saw into a pluck</i>
OSC 1C	Plucked Lead <i>Macrosynth PLUCKED; try BOWED or BLOWN too</i>

🎵 CHORDS & PADS	
CRD	One-Track Chords <i>Hypersynth chord bank; change chords per step with CRD</i>
SWM	Lush Pad <i>Moderate SWM and WID with slow attack and release</i>
OSC 28	Paraphonic Chords <i>Macrosynth WAV PARAPHONIC plays chords on one track</i>
ARP 47	Chip Chords <i>Fast major arpeggio (ARP 37 minor); ARC sets the speed</i>
TBX	More FX per Step <i>Aux table runs extra commands alongside the note</i>
SCA	Key Change <i>Switch a track's scale mid-song</i>
ADSR	Smooth Retriggers <i>Repeated pad notes resume from the current envelope level</i>
SRV	Wash <i>High reverb send plus a long release for ambient beds</i>

🎛️ SAMPLING	
SLICE	Chop a Break <i>Slice in the sample editor; snap markers to tempo</i>
STA	Warp Stutter <i>Move the start point on short notes for old-school warping</i>
LFO	Timestretch <i>LFO to LOOP ST, ramp shape, RETRIG (FRQ 10 ≈ 1 bar)</i>
PLY	Reverse Swell <i>Reverse a crash or vocal into the downbeat</i>
CHA	Generative Breaks <i>Chance on slice notes; SED locks a take you like</i>
EDIT ×2	Resample <i>Render a selection to a sampler instrument, then mangle it</i>
OTT	Punch Up a Sample <i>Sample editor Process: OTT squashes and brightens</i>

⚙️ TABLE TRICKS	
TIC 01	Flams & Grace Notes <i>Softer note a semitone below, one tick before the hit</i>
HOP 00	Looping Arp <i>Intervals in the N column, HOP 00 at the end repeats them</i>
HOP 3X	Loop N Times <i>First digit counts repeats before moving on</i>
V COL	Custom Envelope <i>Step the volume column for gates and tremolo</i>
TIC 00	Per-Note Automation <i>Advance a row per note: cycle cutoff or pan each hit</i>
TIC FE	Kit on One Track <i>Note picks the row; INS per row swaps instruments</i>
TIC FD	Velocity Layers <i>Velocity picks the row, so harder hits change the sound</i>
THO	Table Sections <i>Split one table into parts and hop between them</i>
TBL	Swap Tables <i>Change an instrument's table mid-phrase for variations</i>

⚙️ MIX & FX	
TRIG ENV	Sidechain Pump <i>Trig envelope on volume, triggered by the kick track, inverted</i>
SDL FF	Dub Throw <i>Full delay send on one hit, back to 00 on the next step</i>
REP	Send Ramp <i>SRV then REP ramps it each tick; RTO sets where it stops</i>
DJC	Build-Up <i>Sweep the global DJ filter over 4–8 bars; DJR adds bite</i>
TSP	Final Chorus Lift <i>Transpose the whole song up on a song row</i>
SMX	Width <i>A touch of ModFX send widens pads and leads</i>
USB	Multitrack Recording <i>Multichannel USB audio sends each track to a DAW</i>

★ STYLE STARTERS	
TPO 80	Techno · 128 <i>Drum-env kick, offbeat open hat, trig-env pump, dub throws</i>
TPO 7C	House · 124 <i>Groove 07 05 hats, offbeat bass, Hypersynth stabs</i>
TPO 78	Dub Techno · 120 <i>FM chord stab, SDL throws, long reverb, DJC sweeps</i>
TPO AA	Jungle · 170 <i>Sliced break, RET rolls, PSL sub bass</i>
TPO 5A	Lo-Fi · 90 <i>Groove 08 04, ERR drift, SIN limiter, lots of reverb</i>
TPO 96	Chiptune · 150 <i>Wavsynth pulse, ARP chords, PVB leads, KIL-tight hats</i>
TPO 46	Ambient · 70 <i>Hypersynth pads, LFO on cutoff, CHA sparse notes, SED</i>
